

How to use a Gamma Seal Pail

CAUTION
BEFORE HANDLING COOKING
OIL MAKE SURE THE
TEMPERATURE IS LESS THAN
38° CELSIUS OR 100°
FAHRENHEIT

STEP 1

Fill each pail half full and secure the top lid by turning it clockwise.

Carry one half full pail in each hand for balance and stability.

STEP 2

Check oil level in the oil container to ensure there is empty space before pouring.

Remove the lid from the pail by turning it counter clockwise.

Lift and pour from the pail into the container.

STEP 3

Place lid back on pail and turn clockwise to close.

Return pails to accepted storage location.
